PP-0011-10	None	None	All Models	All Models	All Models	No	No	Yes

* Varies per weld on Pedaltrain. The panel SHOULD fit on the legacy PT-1 and PT-2 after feet kit have been installed; however if there are larger welds it may not have enough clearance. Larger welds that do not allow panels to clear will require a slight grinding to fit the panel—or—a couple of washers added before the feet. See below for pictures highlighting the welding joint we are speaking of.
